Continuation Sheet (PTOL-413)

Application No. 10/539,961

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussion of results. Examiner indicated that the only comparative examples with substantiated and clear and convincing evidence of new or unexpected results were comparatives 3 & 4. This comparison is persuasive for the specific blends of polyols of example 3, including the amounts, formic acid in the amount specified and/or from 1.5 -2.0, pentanes and/or the non-halogenated alkanes of the claims in the amount exemplified. Examples 1 & 2 set forth an improper back to back comparison in that there are significant differences in the composition beyond the features being compared. 5 & 6 and 7 are not comparisons of the invention in that they do not contain the required physical blowing agent of the claims. Examples 8 and 9 set forth an improper back to back comparison in that there are significant differences in the composition beyond the features being compared, and it is not clearly established what difference the skin cure result is attributable to. It is not seen or established how examples 10-19 are relevant in addressing the rejection of record. It is maintained that no claim as they currently stand are allowable.
